

The Center for Autism

BETTER OUTCOMES FOR LIFE

TRAINING SERVICES

The Center for Autism's experienced facilitators offer specialized autism training to individuals, groups & businesses working in a variety of settings. Through our training courses, participants will learn more about autism & how to address the unique needs of people with Autism Spectrum Disorder (ASD).

Training length & specific topics can be customized to your needs. Examples of training provided include the following:

Autism 101

An engaging training designed to help your team feel more comfortable interacting with customers, clients and co-workers with ASD.

Diving Deeper into the Spectrum

This extended session will build upon the Autism 101 training by offering more detailed understanding of issues like sensory processing, communication and behaviors. Additionally, training will provide practical skills for connecting with individuals with ASD.

Environmental Consultation

This consultation and training will address how to make your space more sensory friendly and safe for individuals with ASD.

First Responders/Security Guards

An extensive training that provides an overview of Autism Spectrum Disorder, and teaches practical skills for how to work with an individual who may be in crisis or a dangerous situation.

Emergency Room/Hospital Staff

Skills training for all levels of staff, from support staff to medical professionals. As well as a basic environmental consultation of the ER where a person may come through in crisis.
